EXPERIENCES

Software Engineer Intern at REDDOT Digital Ltd.

October, 2023 - Present

PROJECTS

Weather(Live)

- A weather forecast website built by js, React and TailwindCSS
- This website is fully responsive
- It has hourly-daily forecast, humidity, wind speed, sunrise and sunset information
- It has GPS search option and also people can search the city
- Fetched the data from OpenWeatherMap API
- Update the time by Luxon library
- Also used react toastify
- Source Code: https://github.com/Syed997/forecast.git

Portfolio (Live)

- The website is built by JavaScript, React and TailwindCSS
- Use react scroll for smooth scrolling
- This website is fully responsive
- Source Code: https://github.com/Syed997/portfolio.git

Quiz App (Live)

- This website is built by Javascript, React and TailwindCSS
- This is a fully responsive website
- React Router has been used to make this a single page application
- Source Code: https://github.com/Syed997/quiz_web.git

Calculator (Live)

- The website build by HTML, CSS, Js
- A website-based calculator where people can do mathematical calculations
- It's able to do simple arithmetic, which includes addition, subtraction, multiplication, and division
- Source Code: https://github.com/Syed997/calculator.git
